Bibliographies in this series are derived from computerized on-line searches of selected data bases. Timeliness of the topic and evidence of extensive interest are selection criteria. Comprehensive subject coverage is not an objective; however, the citations provide a substantial recent resource for investigation of the subject. Each bibliography is updated or dropped after six months.

Copies of this bibliography may be made for use or distribution without prior approval. The inclusion or omission of a particular publication or citation may not be construed as endorsement or disapproval.

To request a copy of a bibliography in this series, send the title, series number, and a return addressed gummed label to:

FILE 10

Contains citations to documents published 1982 and earlier which were added to the Library's collections between 1979 and 1982.

00001

Agricultural education of farmers--the needs of farm women.

Cliff, B. Bathurst, N.S.W., Agricultural Technologists of Australia. The Agricultural technologist. May 1979. v. 10 (2). p. 13. (NAL call no.: S17.A35).

00002

Attitudes of young men and women toward the older rural youth program in Columbiana County, Ohio / by William Gilbert Kneisel.

Kneisel, William Gilbert, 1920. 1952. Thesis (M.S.)--Cornell University, 1952. Extension Repository Collection -Typescript (carbon copy) -Vita.vii, 112 leaves ; 27 cm. Bibliography: leaves 110-112. (NAL call no.: S544.3.03K59).

00003

Attitude of farm women towards farm innovations (in India).

Sharma, D.K. Singh, T.R. Jabalpur. J.n.k.v.v. research journal. Oct 1980 (pub.1980). v. 10 (4). p. 289-293. 7 ref. (NAL call no.: S19.J32).

00004

Career opportunities for women in British agriculture.

Gasson, R. Barking, Essex, Applied Science Publishers. Agricultural administration. July 1981. v. 8 (4). p. 241-253. 11 ref. (NAL call no.: S3.A32).

00005

A comparative study of users and non-users of chemical pesticides among middle-class urban women in Roanoke and Richmond, Virginia : based on educational attainment and other selected variables / by

Frances Hilt Graham.

Graham, Frances Hilt, 1924. 1967. Thesis (M.S.)--Virginia Polytechnic Institute, 1967. Extension Repository Collection -Typescript (photocopy)vii, 86 p. ; 28 cm. Bibliography: p. 61-64. (NAL call no.: S534.V8G7).

00006

A comparison of the rank and salary of male and female agricultural economists.

Lee, L.K. Lexington, Ky., American Agricultural Economics Association. Extract: The distribution of female agricultural economists by type of job, level of education, and among academics, tenure status, is analyzed along with data on salaries, experience, and research productivity. Second, the relative rank of women within the profession is explored by comparing profile data of male and female AAEEA members. Finally, a model is developed to determine if significant salary differentials exist between men and women of comparable rank. Conclusions about the current status of women in agricultural economics are presented. American journal of agricultural economics. Dec 1981. v. 63 (5). p. 1013-1018. 4 ref. (NAL call no.: 280.8 J822).

00007

A comparison of the rank and salary of male and female agricultural economists.

Lee, L.K. (Stillwater, Okla.), The Station. Extract: The objectives of this paper are, first, to develop a profile of women within the agricultural economics profession. The distribution of female

agricultural economists by type of job, level of education, and among academics, tenure status, are analyzed along with data on salaries, experience, and research productivity. Second, the relative rank of women within the profession is explored by comparing profile data of male and female AAEEA members. Finally, a model is developed to determine if significant salary differentials exist between men and women of comparable rank. Conclusions about the current status of women in agricultural economics are presented. Professional paper - Oklahoma Agricultural Experiment Station. July 28, 1981. July 28, 1981. (1063). 14 p. 4 ref. (NAL call no.: 917033(AGE)).

00008

The conduct of the survey on the opportunities for and status of women in agricultural economics. Lundeen, A.A. Clauson, A.L. Lexington, Ky., American Agricultural Economics Association. Extract: At its July 1980 meeting, the Executive Board of the American Agricultural Economics Association authorized formation of an ad hoc committee to investigate systematically the status, role, and opportunities for women in agricultural economics. A survey of females and males in the profession, including but not limited to members of AAEEA, was undertaken. Because of the small number of women in agricultural economics (e.g., membership lists indicate that women comprise less than 5% of the AAEEA), all women who could

be identified in agricultural economics or related specialties were included in the survey. A sample of the much larger population of male economists was selected. American journal of agricultural economics. Dec 1981. v. 63 (5). p. 1010-1012. (NAL call no.: 280.8 J822).

00009

The decision making by farm women regarding improved agricultural practices. Malik, R. New Delhi, The Indian Society of Extension Education. Indian journal of extension education. Dec 1979. v. 15 (3/4). p. 64-69. 1 ref. (NAL call no.: S544.5.I5I52).

00010

Duration of activities and energy expenditure of female farmers in dry and rainy seasons in Upper-Volta. Bleiberg, Fanny M. Brun, Thierry A.; Goihman, S.; Gouba, Emile. London, Cambridge University Press. Abstract: A time-motion study assessed the daily activity pattern and energy expenditure of 15 female farmers from Upper Volta during dry and rainy seasons. It was estimated that their mean energy output increased from 9.7 MJ (2320 kcal) in the dry season to 12.1 MJ (2890 kcal) in the rainy season, reflecting when heavy physical work was performed in conjunction with agricultural activities (hoeing, weeding, and planting). The type of daily activity and the time spent on each activity changed significantly with the season. Although mean body fat in these women was comparable to percentages in European women, triceps skinfold was found to

be 60% below standard values. These findings show that during the rainy season, the energy needs of these women working in a subsistence agriculture are very high, often above their energy intake. The British journal of nutrition. Jan 1980. v. 43 (1). p. 71-82. ill., charts. 31 ref. (NAL call no.: 389.8 B773) .

00011

Economic aspects of rural women (India).

Eswaraiah, G. Bombay. Rural india. Sept 1978. v. 41 (9). p. 224. (NAL call no.: 281.28 R889) .

00012

Enterprising women forge unique co-op.

Sharp, A. Vancouver, B.C., British Columbia Central Credit Union. Abstract: This publishing co-op, run entirely by women, handles a wide variety of graphic arts. The women describe their management methods and future plans for expansion. Enterprise. Jan/Feb 1981. v. 41 (1). p. 14, 32. (NAL call no.: 955618(AGC)) .

00013

Evaluation study on farm women training program in Gwalior District (Madhya Pradesh) January, 1978.

New Delhi Directorate of Extension, Ministry of Agriculture & Irrigation, Government of India 1978. Cover title: Evaluation of the farm women training programme, Gwalior District (Madhya Pradesh), Jan. 1978 -At head of title: Farmers training and education program -On cover: Farmers training and functional literacy project

-PL-480, I-E-33747.vi, 64 p. ; 30 cm. (NAL call no.: S544.5.I4E8) .

00014

Evidence on barriers to the parallel advancement of male and female agricultural economists.

Lane, S. Lexington, Ky., American Agricultural Economics Association. Extract: In this analysis, the hypotheses to be tested, stated in the null form, were that (a) attitudes, human capital, and mobility did not result in salary differences between female and male agricultural economists holding equivalent positions, and (b) barriers to parallel advancement were not falling and therefore salary differences for male and female agricultural economists holding equivalent positions, controlling for years out of school, should be the same for younger and for older women. The evidence suggests that attitudes of both the males and the females and the difference in human capital do result in differences in salaries per year since completion of the requirements for the highest degree and the main impact of these factors is on younger female agricultural economists. American journal of agricultural economics. Dec 1981. v. 63 (5). p. 1025-1031. 15 ref. (NAL call no.: 280.8 J822) .

00015

Farm women.

Regina, Sask. Women's Division, Saskatchewan Dept. of Labour 1979. Cover title. 31 p. : ill. ; 28 cm. Bibliography: p. 19-20. (NAL call no.: HD6100.S27S28) .

00016

**The impact of women and urban
students on agricultural
college enrollments.**
Daluge, R.H. Thompson, J.F.
Urbana, Ill., The Association.

NACTA journal - National
Association of Colleges and
Teachers of Agriculture. June
1981. v. 25 (2). p. 19-24. 20
ref. (NAL call no.: 275.9
N213).

00021

**Implications for women and
their work of introducing
nutritional considerations
into agricultural and rural
development projects.**
Savane, Marie Angelique.
Tokyo, United Nations
University. Abstract: Several
distinct problems contributing
to the lack of success in many
nutrition programs in
developing countries are
addressed, namely, the ignored
role of women in food
production and family
nutrition, stemming from a
general exclusion of women
from decision processes. A
discussion of the woman's role
covers food production
practices in Africa and the
impact of agricultural and
rural development projects on
her traditional role. Reasons
for the failure of nutrition
programs are examined,
including content and
approach. The conclusions seem
to point to a need for
structural changes in the
class system to free women
from cultural and social
subjugation before their
importance to family nutrition
can be realized. Food and
nutrition bulletin. July 1981.
v. 3 (3). p. 1-5. 16 ref. (NAL
call no.: TX341.F64 F&N).

00022

Availability of Cited References

USDA Employees. Books will be sent on loan; photocopy of journal articles or non-circulating publications will be sent in lieu of loan. Submit requests on Form AD-245(5/78) which is available from an agency procurement office. USDA employees in a state participating in the Regional Document Delivery System should send the requests through their state land-grant institutions (see list on back). Employees in other states may send requests directly to: Utilization Section, Science and Education, National Agricultural Library, Beltsville, Maryland 20705.

The NAL call number given in the citation should be transferred to the proper box on the AD-245.

NON-USDA Requestors. Requestors are expected to use the resources of their local state or national libraries before sending requests to the National Agricultural Library. Individuals should arrange for loans through their nearest library as loans are made only to other libraries. Individuals may request photocopy on USDA Form LF-607 which can be requested in advance from the Library.

Requests sent through university libraries, information centers and commercial organization libraries should be submitted on the American Library Association or International Interlibrary request form. TWX messages are accepted (710-028-0506). Requests for photocopy will not be processed without a statement that the request complies with copyright regulations.

The NAL call number given in the citation should be transferred to the proper box on the LF-607 or the interlibrary loan request form.

Loans. Materials are loaned for one month; renewals for an additional month may be requested if the request is received before the due date. All loans are sent first class and should be returned in the same manner.

Restrictions to loans. The following materials will not be loaned: serials and journals (except USDA serials), proceedings of conferences or symposia, rare or reserve books, reference books, or microforms. Only monographs published in the U.S. will be lent to libraries in other countries. Photocopy rates are:

Electrostatic copy, microfilm and microfiche:

\$3.00 for the first 10 pages or fraction copied from a single article or publication.

\$2.00 for each additional 10 pages or fraction.

Duplication of NAL-owned microfilm: \$10.00 per reel

Duplication of NAL-owned microfiche: \$3.00 for the first fiche and

\$.50 for each additional fiche.

Invoices for completed work will be sent twice yearly. Do NOT send payment with requests. NOTE: Once a request has been accepted and processing has begun, the requests cannot be cancelled. Any request placed is regarded as binding on the part of the requestor and appropriate charges will be made.

SEND REQUESTS TO: ILL/Photoduplication Section, National Agricultural Library, Beltsville, Maryland 20705.

Questions regarding these services should be directed to the attention of the Head, Utilization Section (301) 344-3761.

Through agreements with the major land-grant libraries in select states, USDA employees or libraries in those states may send their requests for document service directly to the land-grants for service. If the document cannot be supplied, it will be automatically forwarded to a larger regional land-grant library and a notice of this action sent back to the requester. If the regional cannot fill the request, it is forwarded to the National Agricultural Library (Lending Division) for completion. This service exists in the following states and AD-245 forms may be sent to the libraries or NAL. Phone numbers may be used for emergency services.
